技术规格

Background:	This gene encodes a member of the acyl coenzyme family. The encoded protein hydrolyzes the CoA thioester of palmitoyl-CoA and other long-chain fatty acids. Decreased expression of this gene may be associated with mesial temporal lobe epilepsy. Alternatively spliced transcript variants encoding distinct isoforms with different subcellular locations have been characterized.
Applications:	ELISA, IHC
Name of antibody:	ACOT7
Immunogen:	Fusion protein of human ACOT7
Full name:	acyl-CoA thioesterase 7

SwissProt:	O00154
ELISA Recommended dilution:	1000-2000
IHC positive control:	Human brain
IHC Recommend dilution:	20-100
