技术规格

Background:	Specifically phosphorylates the agonist-occupied form of the beta-adrenergic and closely related receptors, probably inducing a desensitization of them. Key regulator of LPAR1 signaling. Competes with RALA for binding to LPAR1 thus affecting the signaling properties of the receptor. Desensitizes LPAR1 and LPAR2 in a phosphorylation-independent manner.
Applications:	WB
Name of antibody:	ADRBK1(Ab-86)
Immunogen:	Synthesized peptide derived from N-terminal of human ADRBK1.
Full name:	adrenergic, beta, receptor kinase 1
Synonyms :	GRK2; BARK1; BETA-ARK1
SwissProt:	P25098
WB Predicted band size:	80 kDa
WB Positive control:	NIH/3T3 cells lysate
WB Recommended dilution:	500-3000
