技术规格

Background:	This gene encodes a member of the Argonaute family of proteins which play a role in RNA interference. The encoded protein is highly basic, and contains a PAZ domain and a PIWI domain. It may interact with dicer1 and play a role in short-interfering-RNA-mediated gene silencing. This gene is located on chromosome 1 in a cluster of closely related family members including argonaute 3, and argonaute 4.
Applications:	ELISA, IHC
Name of antibody:	AGO1
Immunogen:	Synthetic peptide of human AGO1
Full name:	argonaute RISC catalytic component 1
Synonyms :	Q99; EIF2C; EIF2C1; GERP95
SwissProt:	Q9UL18
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human cervical cancer and Human brain
IHC Recommend dilution:	50-200
