技术规格

Background:	This gene encodes one of several proteins that are critical in the development of the neuromuscular junction (
--------------------	--

	NMJ), as identified in mouse knock-out studies. The encoded protein contains several laminin G, Kazal type serine protease inhibitor, and epidermal growth factor domains. Additional post-translational modifications occur to add glycosaminoglycans and disulfide bonds. In one family with congenital myasthenic syndrome affecting limb-girdle muscles, a mutation in this gene was found.
Applications:	ELISA, IHC
Name of antibody:	AGRN
Immunogen:	Synthetic peptide of human AGRN
Full name:	agrin
SwissProt:	O00468
ELISA Recommended dilution:	3000-10000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	50-200
