

兔抗 AP1G1 多克隆抗体

中文名称：兔抗 AP1G1 多克隆抗体

英文名称：Anti-AP1G1 rabbit polyclonal antibody

别名：ADTG, CLAPG1

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：AP1G1

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Adaptins are important components of clathrin-coated vesicles transporting ligand-receptor complexes from the plasma membrane or from the trans-Golgi network to lysosomes. The adaptin family of proteins is composed of four classes of molecules named alpha, beta-, beta prime- and gamma- adaptins. Adaptins, together with medium and small subunits, form a heterotetrameric complex called an adaptor, whose role is to promote the formation of clathrin-coated pits and vesicles. The protein encoded by this gene is a gamma-adaptin protein and it belongs to the adaptor complexes large subunits family. Two transcript variants encoding different isoforms have been found for this gene.

Applications:	ELISA, IHC
Name of antibody:	AP1G1
Immunogen:	Synthetic peptide of human AP1G1
Full name:	adaptor related protein complex 1 subunit gamma 1
Synonyms:	ADTG; CLAPG1
SwissProt:	O43747
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer
IHC Recommend dilution:	25-100
