

兔抗 APOBEC2 多克隆抗体

中文名称: 兔抗 APOBEC2 多克隆抗体

英文名称: Anti-APOBEC2 rabbit polyclonal antibody

别名: ARP1; ARCD1

相关类别: 一抗

储存: 冷冻 (-20℃)

宿主: Rabbit

抗原: APOBEC2

反应种属: Human, Mouse

标记物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:	Apolipoprotein B mRNA editing enzyme, catalytic polypeptide-like 2 (APOBEC2) is a 224 amino acid protein that belongs to the cytidine and deoxycytidylate deaminase family. Expressed exclusively in heart and skeletal muscle, APOBEC2 is thought to be a probable C (cytidine) to U (uridine) editing enzyme. However, unlike other members of the family, such as APOBEC1, which mediates the editing of apolipoprotein (apo) B mRNA, APOBEC2 does not display any detectable apoB mRNA editing activity. Also, APOBEC2 has been shown to have low, but definite, intrinsic cytidine deaminase activity.
Applications:	ELISA, WB

Name of antibody:	APOBEC2
Immunogen:	Synthetic peptide of human APOBEC2
Full name:	apolipoprotein B mRNA editing enzyme, catalytic poly peptide-like 2
Synonyms :	ARP1; ARCD1
SwissProt:	Q9Y235
ELISA Recommended dilution:	1000-2000
WB Predicted band size:	26 kDa
WB Positive control:	Mouse muscle and skin tissue
WB Recommended dilution:	200-1000
