

兔抗 BMPR1B 多克隆抗体

中文名称：兔抗 BMPR1B 多克隆抗体

英文名称： Anti-BMPR1B rabbit polyclonal antibody

别名： ALK6; ALK-6; CDw293

抗原： BMPR1B

储存： 冷冻（-20℃）

宿主： Rabbit

反应种属： Human, Mouse

相关类别： 一抗

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

This gene encodes a member of the bone morphogenetic protein (BMP) receptor family of transmembrane serine/threonine kinases. The ligands of this receptor are BMPs, which are members of the TGF-beta superfamily. BMPs are involved in endochondral bone formation and embryogenesis. These proteins transduce their signals through the formation of heteromeric complexes of 2 different types of serine (threonine) kinase receptors: type I receptors of about 50-55 kD and type II receptors of about 70-80 kD. Type II receptors bind ligands in the absence of type I receptors, but they require their respective type I receptors for signaling, whereas type I receptors require their respective type II receptors for li

	gand binding.
Applications:	ELISA, IHC
Name of antibody:	BMPR1B
Immunogen:	Fusion protein of human BMPR1B
Full name:	bone morphogenetic protein receptor, type 1B
Synonyms :	ALK6; ALK-6; CDw293
SwissProt:	O00238
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human thyroid cancer and human gastric cancer
IHC Recommend dilution:	25-100
