

## 兔抗 CD63 多克隆抗体

中文名称：兔抗 CD63 多克隆抗体

英文名称：Anti-CD63 rabbit polyclonal antibody

别名：CD63 molecule; MLA1; ME491; LAMP-3; OMA81H; TSPAN30

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：CD63

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

### 技术规格

#### Background:

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing results in multiple transcript variants encoding different pr

	otein isoforms.
<b>Applications:</b>	ELISA, WB
<b>Name of antibody:</b>	CD63
<b>Immunogen:</b>	Synthetic peptide of human CD63
<b>Full name:</b>	CD63 molecule
<b>Synonyms:</b>	MLA1; ME491; LAMP-3; OMA81H; TSPAN30
<b>SwissProt:</b>	P08962
<b>ELISA Recommended dilution:</b>	5000-10000
<b>WB Predicted band size:</b>	26 kDa
<b>WB Positive control:</b>	293T and A549 cell lysates
<b>WB Recommended dilution:</b>	500-2000
