

兔抗 TRO 多克隆抗体

中文名称:	兔抗 TRO 多克隆抗体
英文名称:	Anti-TRO rabbit polyclonal antibody
别名:	trophinin; MAGED3; MAGE-d3
相关类别:	一抗
储存:	冷冻 (-20℃)
宿主:	Rabbit
抗原:	TRO
反应种属:	Human
标记物:	Unconjugate
克隆类型:	rabbit polyclonal

技术规格

Background:	This gene encodes a membrane protein that mediates cell adhesion between trophoblastic cells and the epithelial cells of the endometrium. The encoded protein participates in cell signalling during embryo implantation, and may also be involved in cancer formation. This gene is located near several other closely related genes on chromosome X. Alternative splicing results in multiple transcript variants.
Applications:	ELISA, IHC
Name of antibody:	TRO
Immunogen:	Fusion protein of human TRO
Full name:	trophinin
Synonyms:	MAGED3; MAGE-d3
SwissProt:	Q12816
ELISA Recommended dilution:	5000-10000

IHC positive control:	Human tonsil
IHC Recommend dilution:	50-100
