

小鼠抗 HABP2 单克隆抗体

中文名称： 小鼠抗 HABP2 单克隆抗体

英文名称： Anti-HABP2 mouse monoclonal antibody

别名： hyaluronan binding protein 2; FSAP; HABP; PHBP; HGFAL; NMTCS

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Mouse

抗原： HABP2

反应种属： Human

标记物： Unconjugate

克隆类型： mouse monoclonal

技术规格

Background:	This gene encodes a member of the peptidase S1 family of serine proteases. The encoded preproprotein is secreted by hepatocytes and proteolytically processed to generate heavy and light chains that form the mature heterodimer. Further autoproteolysis leads to smaller, inactive peptides. This extracellular protease binds hyaluronic acid and may play a role in the coagulation and fibrinolysis systems. Mutations in this gene are associated with nonmedullary thyroid cancer and susceptibility to venous thromboembolism. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed.
Applications:	WB, IHC
Name of antibody:	HABP2

Immunogen:	Fusion protein of human HABP2
Full name:	hyaluronan binding protein 2
Synonyms:	FSAP; HABP; PHBP; HGFAL; NMTC5
SwissProt:	Q14520
IHC positive control:	Human breast tissue
IHC Recommend dilution:	500-2000
WB Predicted band size:	63 KD
WB Positive control:	HepG2, MCF7 and A549 cell lysates
WB Recommended dilution:	200-1000
