

## BAG5 抗原(重组蛋白)

- 中文名称: BAG5 抗原(重组蛋白)
- 英文名称: BAG5 Antigen (Recombinant Protein)
- 储存: 冷冻(-20℃)
- 相关类别: 抗原

概述

Fusion protein corresponding to C terminal 350 amino acids of human BAG5

## 技术规格

Full name:	Bcl-2-associated athanogene 5
Swissprot:	Q9UL15
Gene Accession:	BC050551
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The protein encoded by this gene is a member of the BAG1-rel ated protein family. BAG1 is an anti-apoptotic protein that func tions through interactions with a variety of cell apoptosis and g rowth related proteins including BCL-2, Raf-protein kinase, stero id hormone receptors, growth factor receptors and members of the heat shock protein 70 kDa family. This protein contains a B AG domain near the C-terminus, which could bind and inhibit t he chaperone activity of Hsc70/Hsp70. Three transcript variants encoding two different isoforms have been found for this gene.
