

兔抗 ITGA7 多克隆抗体

- 中文名称: 兔抗 ITGA7 多克隆抗体
- 英文名称: Anti-ITGA7 rabbit polyclonal antibody
- 相关类别: 一抗
- 储存: 冷冻(-20℃)
- 宿 主: Rabbit
- 抗原: ITGA7
- 反应种属: Human, Mouse, Rat
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

技术规格

Background:	The protein encoded by this gene belongs to the integrin al pha chain family. Integrins are heterodimeric integral membr ane proteins composed of an alpha chain and a beta chain. They mediate a wide spectrum of cell-cell and cell-matrix int eractions, and thus play a role in cell migration, morphologi c development, differentiation, and metastasis. This protein f unctions as a receptor for the basement membrane protein I aminin-1. It is mainly expressed in skeletal and cardiac muscl es and may be involved in differentiation and migration pro cesses during myogenesis. Defects in this gene are associate d with congenital myopathy. Alternatively spliced transcript v ariants encoding different isoforms have been noted for this gene.
Applications:	ELISA, IHC
Name of antibody:	ITGA7

Immunogen:	Synthetic peptide of human ITGA7
Full name:	integrin subunit alpha 7
SwissProt:	Q13683
ELISA Recommended diluti on:	5000-10000
IHC positive control:	Human brain
IHC Recommend dilution:	25-100
