

兔抗 ITGB7 多克隆抗体

中文名称: 兔抗 ITGB7 多克隆抗体

英文名称: Anti-ITGB7 rabbit polyclonal antibody

别名: integrin subunit beta 7

储存: 冷冻 (-20℃)

抗原: ITGB7

宿主: Rabbit

反应种属: Human, Mouse

相关类别: 一抗

标记物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:	<p>This gene encodes a protein that is a member of the integrin superfamily. Members of this family are adhesion receptors that function in signaling from the extracellular matrix to the cell. Integrins are heterodimeric integral membrane proteins composed of an alpha chain and a beta chain. The encoded protein forms dimers with an alpha4 chain or an alphaE chain and plays a role in leukocyte adhesion. Dimerization with alpha4 forms a homing receptor for migration of lymphocytes to the intestinal mucosa and Peyer's patches. Dimerization with alphaE permits binding to the ligand epithelial cadherin, a calcium-dependent adhesion molecule. Alternate splicing results in multiple transcript variants. Additional alternatively spliced transcript variants of this gene have</p>
--------------------	---

	been described, but their full-length nature is not known.
Applications:	ELISA, IHC
Name of antibody:	ITGB7
Immunogen:	Synthetic peptide of human ITGB7
Full name:	integrin subunit beta 7
SwissProt:	P26010
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer and Human liver cancer
IHC Recommend dilution:	10-50
