

兔抗 CHADL 多克隆抗体

中文名称：兔抗 CHADL 多克隆抗体

英文名称：Anti-CHADL rabbit polyclonal antibody

别名：chondroadherin like; SLRR4B

相关类别：一抗

抗原：CHADL

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Members of the small leucine-rich proteoglycan (SLRP) family are mostly extracellular proteins that function upstream of multiple signaling cascades. They affect intracellular phosphorylation and modulate distinct pathways, such as those driven by Toll-like receptors, TGF β and receptor tyrosine kinases. As a member of the SLRP family, CHADL (Chondroadherin-like protein) is a 762 amino acid protein containing 21 LRR (leucine-rich) repeats, which promote protein-ligand interactions. Chondroadherin, a closely related protein, promotes attachment of chondrocytes, osteoblasts and fibroblasts and also plays an important role in the regulation of chondrocyte proliferation and growth. CHADL is a secreted protein that is located in the extracellular space.

	ace. There are two isoforms of CHADL that exist as a result of alternative splicing events. Potential negative modulator of chondrocyte differentiation. Inhibits collagen fibrillogenesis in vitro. May influence chondrocyte's differentiation by acting on its cellular collagenous microenvironment.
Applications:	ELISA, IHC
Name of antibody:	CHADL
Immunogen:	Synthetic peptide of human CHADL
Full name:	chondroadherin like
Synonyms:	SLRR4B
SwissProt:	Q6NUI6
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer
IHC Recommend dilution:	20-100
