

兔抗 CHERP 多克隆抗体

中文名称：兔抗 CHERP 多克隆抗体

英文名称： Anti-CHERP rabbit polyclonal antibody

别名： SRA1; DAN16; SCAF6

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Rabbit

抗原： CHERP

反应种属： Human

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

The regulation of the intracellular concentration of calcium is important for proper maintenance of voltage-gated calcium channels which control muscle and nerve function. Calcium homeostasis is regulated by a variety of proteins. CHERP (calcium homeostasis endoplasmic reticulum protein), also known as SRA1, DAN16 or SCAF6, is a 916 amino acid protein that localizes to the cytoplasm and the endoplasmic reticulum (ER). Expressed in pancreas, brain, lung, placenta, liver, kidney, heart and skeletal muscle, CHERP is involved in maintaining calcium homeostasis and plays a role in cell growth and proliferation. CHERP contains one G-patch domain, one RPR domain and one SURP motif and is expressed as two isoforms due to alternative splicing.

	g events.
Applications:	ELISA, IHC
Name of antibody:	CHERP
Immunogen:	Fusion protein corresponding to a region derived from 738-916 amino acids of human CHERP
Full name:	calcium homeostasis endoplasmic reticulum protein
Synonyms:	SRA1; DAN16; SCAF6
SwissProt:	Q8IWX8
ELISA Recommended dilution:	5000-10000
IHC Positive control:	Human thyroid cancer;Human liver cancer
IHC Recommended dilution:	20-100
