

Alexa Fluor 488 标记兔抗鸡 IgG

- 中文名称: Alexa Fluor 488 标记兔抗鸡 IgG
- 英文名称: Alexa Fluor 488 conjugated Rabbit Anti-Chicken IgG
- 相关类别: 荧光标记二抗
- 储 存: 冷冻 (-20℃)
- 标记物: Alexa Fluor 488

技术规格

Background:	Immunoglobulin G (IgG) is one of the most abundant protei ns in serum with normal levels between 8-17 mg/mL in adult blood. IgG is important for our defense against microorganis ms and the molecules are produced by B lymphocytes as a part of our adaptive immune response. The IgG molecule ha s two separate functions, to bind to the pathogen that elicit ed the response and to recruit other cells and molecules to destroy the antigen. The variability of the IgG pool is genera ted by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 101 1 variants.
Applications:	1/100-1000 for Immunofluorescence 1100-1000 for FCM
