

兔抗 COL5A3 多克隆抗体

中文名称: 兔抗 COL5A3 多克隆抗体

英文名称: Anti-COL5A3 rabbit polyclonal antibody

抗原: COL5A3

储 存: 冷冻(-20℃) 避光

宿 主: Rabbit

反应种属: Human

相关类别: 一抗

标记物: Unconjugate

克隆类型: Unconjugate

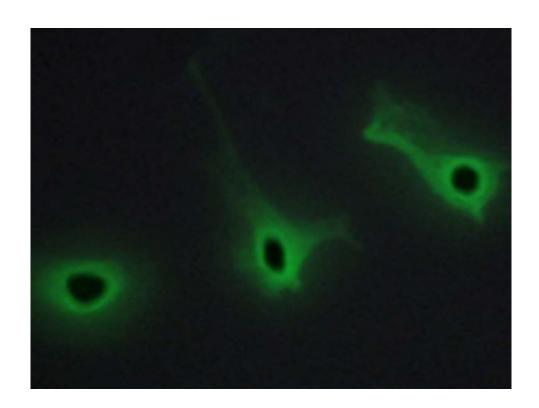

技术规格

	Ţ
Background:	This gene encodes an alpha chain for one of the low abun
	dance fibrillar collagens. Fibrillar collagen molecules are tri
	mers that can be composed of one or more types of alph
	a chains. Type V collagen is found in tissues containing typ
	e I collagen and appears to regulate the assembly of heter
	otypic fibers composed of both type I and type V collagen.
	This gene product is closely related to type XI collagen an
	d it is possible that the collagen chains of types V and XI
	constitute a single collagen type with tissue-specific chain c
	ombinations. Mutations in this gene are thought to be res
	ponsible for the symptoms of a subset of patients with Ehl
	ers-Danlos syndrome type III. Messages of several sizes can
	be detected in northern blots but sequence information ca
	nnot confirm the identity of the shorter messages.
Applications:	IHC, IF
