

## CLEC2B 抗原(重组蛋白)

中文名称: CLEC2B 抗原(重组蛋白)

英文名称: CLEC2B Antigen (Recombinant Protein)

储 存: 冷冻(-20℃)

相关类别: 抗原

概述

Full length fusion protein

## 技术规格

Full name:	C-type lectin domain family 2, member B
Synonyms:	AICL, IFNRG1, CLECSF2, HP10085
Swissprot:	Q92478
Gene Accession:	BC005254
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a com mon protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded type 2 transmembrane protein may function as a cell activation antigen. An alternative splice varian t has been described but its full-length sequence has not been dete rmined. This gene is closely linked to other CTL/CTLD superfamily m embers on chromosome 12p13 in the natural killer gene complex re gion.
