

## KLF15 抗原（重组蛋白）

中文名称： KLF15 抗原（重组蛋白）

英文名称： KLF15 Antigen (Recombinant Protein)

别名： KKLF

储存： 冷冻（-20℃）

相关类别： 抗原

概述

Fusion protein corresponding to N terminal 300 amino acids of human KLF15

技术规格

<b>Full name:</b>	Krüppel-like factor 15
<b>Synonyms:</b>	KKLF
<b>Swissprot:</b>	Q9UIH9
<b>Gene Accession:</b>	BC036733
<b>Purity:</b>	>85%, as determined by Coomassie blue stained SDS-PAGE
<b>Expression system:</b>	Escherichia coli
<b>Tags:</b>	His tag C-Terminus, GST tag N-Terminus
<b>Background:</b>	Krüppel-like factor 15 is a protein that in humans is encoded by the KLF15 gene in the Krüppel-like factor family. KLF15, a kidney-enriched Krüppel-like factor, is a transcriptional activator that binds the CLCNKA promoter. KLF15, which is a nuclear protein, is expressed primarily in liver, heart, skeletal muscle and kidney tissues but is not detected in lymphoid tissues or bone marrow. It is an important regulator of GLUT4 in both adipose and muscle tissues.
