

TRAF3IP2 抗原（重组蛋白）

中文名称：TRAF3IP2 抗原（重组蛋白）

英文名称：TRAF3IP2 Antigen (Recombinant Protein)

别名：TRAF3 interacting protein 2; ACT1; CIKS; C6orf2; C6orf4; C6orf5; C6orf6; PSORS13

储存：冷冻（-20℃）

相关类别：抗原

概述：

Fusion protein corresponding to a region derived from 1-256 amino acids of human TRAF3IP2

技术规格：

Full name:	TRAF3 interacting protein 2
Synonyms:	ACT1; CIKS; C6orf2; C6orf4; C6orf5; C6orf6; PSORS13
Swissprot:	O43734
Gene Accession:	BC002823
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene encodes a protein involved in regulating responses to cytokines by members of the Rel/NF-kappaB transcription factor family. These factors play a central role in innate immunity in response to pathogens, inflammatory signals and stress. This gene product interacts with TRAF proteins (tumor necrosis factor receptor-associated factors) and either I-kappaB kinase or MAP kinase to activate either NF-kappaB or Jun kinase. Several alternative transcripts encoding different isoforms have been identified. Another transcript, which does not encode a protein and is transcribed in the opposite orientation, has been identified. O

verexpression of this transcript has been shown to reduce expression of at least one of the protein encoding transcripts, suggesting it has a regulatory role in the expression of this gene.
