

兔抗 H1-3 多克隆抗体

中文名称: 兔抗 H1-3 多克隆抗体

英文名称: Anti-H1-3 rabbit polyclonal antibody

别 名: H1.3 linker histone, cluster member; H1D; H1.3; H1

相关类别: 一抗

抗 原: H1-3

储 存: 冷冻(-20℃)

宿 主: Rabbit

反应种属: Human, Mouse

标 记 物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

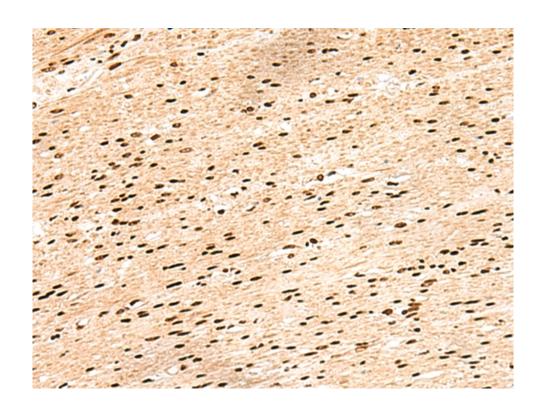

Background:

Histones are basic nuclear proteins responsible for nucleosom e structure of the chromosomal fiber in eukaryotes. Two mol ecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The l inker histone, H1, interacts with linker DNA between nucleos omes and functions in the compaction of chromatin into hig her order structures. This gene is intronless and encodes a r eplication-dependent histone that is a member of the histon e H1 family. Transcripts from this gene lack polyA tails but i nstead contain a palindromic termination element. This gene is found in the large histone gene cluster on chromosome 6.

	[provided by RefSeq, Aug 2015]
Applications:	ELISA, IHC
Name of antibody:	H1-3
Immunogen:	Synthetic peptide of human H1-3
Full name:	H1.3 linker histone, cluster member
Synonyms:	H1D; H1.3; H1F3; H1s-2; HIST1H1D
SwissProt:	P16402
IHC positive control:	Human ovarian cancer and Human colorectal cancer
Tite itecomment and an action.	50-300
