

## 兔抗 EPHB1 多克隆抗体

中文名称：兔抗 EPHB1 多克隆抗体

英文名称：Anti-EPHB1 rabbit polyclonal antibody

别名：ELK; NET; Hek6; EPHT2

相关类别：一抗

储存：冷冻（-20℃）避光

宿主：Rabbit

抗原：EPHB1

反应种属：Human

标记物：Unconjugate

克隆类型：Unconjugate

### 技术规格

#### Background:

Ephrin receptors and their ligands, the ephrins, mediate numerous developmental processes, particularly in the nervous system. Based on their structures and sequence relationships, ephrins are divided into the ephrin-A (EFNA) class, which are anchored to the membrane by a glycosylphosphatidylinositol linkage, and the ephrin-B (EFNB) class, which are transmembrane proteins. The Eph family of receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. Ephrin receptors make up the largest subgroup of the receptor tyrosine kinase (RTK) family. The protein encoded by this gene is a receptor for ephrin-B fa

	mily members.
<b>Applications:</b>	WB
<b>Name of antibody:</b>	EPHB1
<b>Immunogen:</b>	Synthesized peptide derived from C-terminal of human EPHB1.
<b>Full name:</b>	EPH receptor B1
<b>Synonyms :</b>	ELK; NET; Hek6; EPHT2
<b>SwissProt:</b>	P54762
<b>WB Predicted band size:</b>	110 kDa
<b>WB Positive control:</b>	COS7 cells lysate
<b>WB Recommended dilution:</b>	500-3000
