

## 兔抗 RPL13 多克隆抗体

中文名称: 兔抗 RPL13 多克隆抗体

英文名称: Anti-RPL13 rabbit polyclonal antibody

别 名: ribosomal protein L13; L13; BBC1; D16S44E; D16S444E

相关类别: 一抗

储 存: 冷冻(-20℃)

宿 主: Rabbit

抗 原: RPL13

反应种属: Human, Mouse, Rat

标 记 物: Unconjugate

克隆类型: rabbit polyclonal

## 技术规格

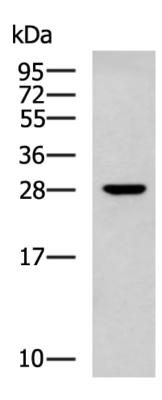

**Background:** 

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. T ogether these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This g ene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L13E family of ribosomal proteins. It is located in the cytoplasm. This gene is expressed at significantly higher levels in benign breast lesions than in breast carcinomas. Alternatively spli ced transcript variants encoding distinct isoforms have be en found for this gene. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudog enes of this gene dispersed through the genome.
