技术规格

Background:	The protein may be important in cardiac antiarrhythmia via the strong suppression of voltage-gated L-type Ca ²⁺ currents. As regulator of voltage-dependent L-type calcium channel subunit alpha-1C trafficking to the cell membrane. Inhibits cardiac hypertrophy through the calmodulin-dependent kinase II (CaMKII) pathway and phosphorylation and activation of CAMK2D. Mostly expressed in the heart and muscle of type II diabetic humans. Also found in the skeletal muscle, lung and adipose tissue. Lesser amounts in placenta and kidney.
Applications:	ELISA, IHC
Name of antibody:	RRAD

Immunogen:	Synthetic peptide of human RRAD
Full name:	Ras-related associated with diabetes
Synonyms :	RAD; RAD1; REM3
SwissProt:	P55042
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human brain and Human ovarian cancer
IHC Recommend dilution:	25-100
