技术规格

Background:	This gene encodes a mitochondrial protein that interacts with reticulon 4, which is a potent inhibitor of regeneration following spinal cord injury. This interaction may be important for reticulon-induced inhibition of neurite growth. Mutations in this gene can cause optic atrophy 10, with or without ataxia, mental retardation, and seizures. There is a pseudogene for this gene on chromosome 12. Alternative splicing results in multiple transcript variants.
Applications:	ELISA, IHC
Name of antibody:	RTN4IP1
Immunogen:	Synthetic peptide of human RTN4IP1

Synonyms:	NIMP; OPA10

SwissProt:	Q8WWW3
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer and human thyroid cancer
