技术规格

Background:	Putative signaling adapter which may play a role in neuronal differentiation. May be involved in regulation of NGF-dependent neurite outgrowth. Proposed to play a role in neuronal vesicular trafficking, specifically involving pre-synaptic membrane proteins. Seems to be involved in signaling pathways that are regulated by the prolonged activation of MAPK. Can regulate the polyubiquitination of IKBKG and thus may be involved in regulation of the NF-kappa-B pathway.
Applications:	ELISA, IHC
Name of antibody:	RUSC1
Immunogen:	Fusion protein of human RUSC1
Full name:	RUN and SH3 domain containing 1
Synonyms:	NESCA

SwissProt:	Q9BVN2
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer
IHC Recommend dilution:	50-300
