

兔抗 CNOT10 多克隆抗体

中文名称：兔抗 CNOT10 多克隆抗体

英文名称：Anti-CNOT10 rabbit polyclonal antibody

别名：CCR4-NOT transcription complex subunit 10

抗原：CNOT10

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse, Rat

相关类别：一抗

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

CNOT10 is a subunit of the CCR4-NOT complex which consists of at least five other CNOT subunit proteins and TAB182. The CCR4-NOT complex is an evolutionarily conserved, multi-component complex known to be involved in transcription, as well as in mRNA degradation. Various subunits (e.g. CNOT1, CNOT3) are uniquely involved in influencing nuclear hormone receptor activities. In effect, this complex has an important role as a transcription regulator and repressor of nuclear receptor signaling that is relevant to the molecular pathways involved in cancer. The CCR4-NOT complex is also involved in the regulation of Histone H3 lysine 4 methylation through a ubiquitin-dependent pathway that likely involves the proteasome.

Applications:	ELISA, IHC
Name of antibody:	CNOT10
Immunogen:	Fusion protein of human CNOT10
Full name:	CCR4-NOT transcription complex subunit 10
SwissProt:	Q9H9A5
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human prostate cancer
IHC Recommend dilution:	20-100
