

兔抗 FCRLA 多克隆抗体

- 中文名称: 兔抗 FCRLA 多克隆抗体
- 英文名称: Anti-FCRLA rabbit polyclonal antibody

别 名: Fc receptor like A; FCRL; FCRX; FREB; FCRL1; FCRLX; FCRLb; FCRLd; FCRLe; FCRLM1; FCRLc1; FCRLc2

- 相关类别: 一抗
- 储存: 冷冻(-20℃)
- 宿 主: Rabbit
- 抗 原: FCRLA
- 反应种属: Human
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

技术规格

Background:	This gene encodes a protein similar to receptors for t he Fc fragment of gamma immunoglobulin (IgG). The se receptors, referred to as FCGRs, mediate the destru ction of IgG-coated antigens and of cells induced by antibodies. This encoded protein is selectively express ed in B cells, and may be involved in their developm ent. This protein may also be involved in the develop ment of lymphomas. Multiple alternatively spliced tran script variants that encode different protein isoforms have been described for this gene.
Applications:	ELISA, WB, IHC
Name of antibody:	FCRLA
Immunogen:	Fusion protein of human FCRLA

全国订货电话 4008-723-722

Full name:	Fc receptor like A
Synonyms:	FCRL; FCRX; FREB; FCRL1; FCRLX; FCRLb; FCRLd; FCRLe
	; FCRLM1; FCRLc1; FCRLc2
SwissProt:	Q7L513
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer and Human prostate cancer
IHC Recommend dilution:	100-200
WB Predicted band size:	39 kDa
WB Positive control:	Ramos cell lysate
WB Recommended dilution:	500-2000
