## 技术规格

	The protein encoded by this gene contains a SH2 domai
	n and a CIS homolog domain. The protein thus belongs t
	o the cytokine-induced STAT inhibitor (CIS), also known a
	s suppressor of cytokine signaling (SOCS) or STAT-induce
	d STAT inhibitor (SSI), protein family. CIS family members
Background:	are known to be cytokine-inducible negative regulators of
	cytokine signaling. The expression of this gene can be in
	duced by GM-CSF and EPO in hematopoietic cells. A hig
	h expression level of this gene was found in factor-indep
	endent chronic myelogenous leukemia (CML) and erythrol
	eukemia (HEL) cell lines.
