

## 兔抗 TCIM 多克隆抗体

- 中文名称：兔抗 TCIM 多克隆抗体
- 英文名称：Anti-TCIM rabbit polyclonal antibody
- 别名：transcriptional and immune response regulator; TC1
- 相关类别：一抗
- 储存：冷冻（-20℃）
- 宿主：Rabbit
- 抗原：TCIM
- 反应种属：Human, Mouse
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

### 技术规格

#### Background:

This gene encodes a small, monomeric, predominantly unstructured protein that functions as a positive regulator of the Wnt/beta-catenin signaling pathway. This protein interacts with a repressor of beta-catenin mediated transcription at nuclear speckles. It is thought to competitively block interactions of the repressor with beta-catenin, resulting in up-regulation of beta-catenin target genes. The encoded protein may also play a role in the NF-kappaB and ERK1/2 signaling pathways. Expression of this gene may play a role in the proliferation of several types of cancer including thyroid cancer, breast

	cancer and hematological malignancies. [provided by RefSeq, Nov 2011]
<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	TCIM
<b>Immunogen:</b>	Fusion protein of human TCIM
<b>Full name:</b>	transcriptional and immune response regulator
<b>Synonyms:</b>	TC1; TC-1; C8orf4
<b>SwissProt:</b>	Q9NR00
<b>IHC positive control:</b>	Human gastric cancer and Human thyroid cancer
<b>IHC Recommend dilution:</b>	40-200
